Checkmate Group

Checkmate is fast becoming one of the most admired designers and manufacturers of height safety equipment in the World. Now into its fourth decade, Checkmate is still very much a family business with four key trading areas: **Safety, Lifting, Flexible Engineering** and **Energy**.

Our entrepreneurial style of management allows each business to run as a standalone entity but it has the support, security and depth of the entire Checkmate Group. This culture inspires smart thinking, pride and value within our team.

We continue to be lead where others follow or imitate and this has been recognised with the honour of the Queen's Award for Innovation, Checkmate's third Queen's Award in recent years.

ANCHORAGE ACCESSORIES & KITS

CheckRing EcoAnchor

The **CheckRing** removable eyebolt is a simple to install anchorage that can be removed by a quick double action method. This ensures the user cannot accidentally disconnect without two separate movements. Due to the nature of the design the eyebolt can spin freely through 360°. This guarantees the eyebolt is in a positive strength plane and not being stressed.

The **CheckRing** system is ideal for installations where a large number of single point anchors are required and the design aesthetics are key. The socket is fitted with an end cap when not in use, leaving a flush unobtrusive finish particularly in hotels and office blocks.

A range of anchor sockets have been designed to cover all applications including:

- ▶ **Cavity Walls**
- ▶ **Brick and Concrete**
- ▶ **Steel**

PPECRO01

CheckRing Removable Eyebolt

The **CheckRing** removable stainless steel eyebolt offers a simple-to-install anchorage that provides complete safety and an unobtrusive aesthetic.

- ▶ Double action via ring pull and sliding button
- ▶ Discreet and unobtrusive
- ▶ Colour coded blanking caps
- ▶ Small drill hole Nom. 22mm
- ▶ 360° rotation
- ▶ Simple release, pull and slide
- ▶ Tested to 15kN

Standards: **EN795 Class A1**

PPEWA-G

Galvanised Anchor Eyebolt

Single point single user anchor device for permanent installation into buildings or structures. For use with PPE to protect against falls from height.

- ▶ Galvanised individually proof tested to 10kN
- ▶ Discrete and unobtrusive
- ▶ Colour coded on request
- ▶ Suitable for use in load bearing brick, concrete and steel
- ▶ Suitable for Abseil when used in pairs
- ▶ Complete range of fixing sockets to suit all applications
- ▶ Available in M12 x 75mm, M12 x 100mm & M12 x 152mm

Standards: **EN795 Class A1** and **BS7883**

CheckRing EcoAnchor

ECO-MKII Mobile Man Anchor

The second generation ecoAnchor has all the key benefits of the original but with many new features and innovations.

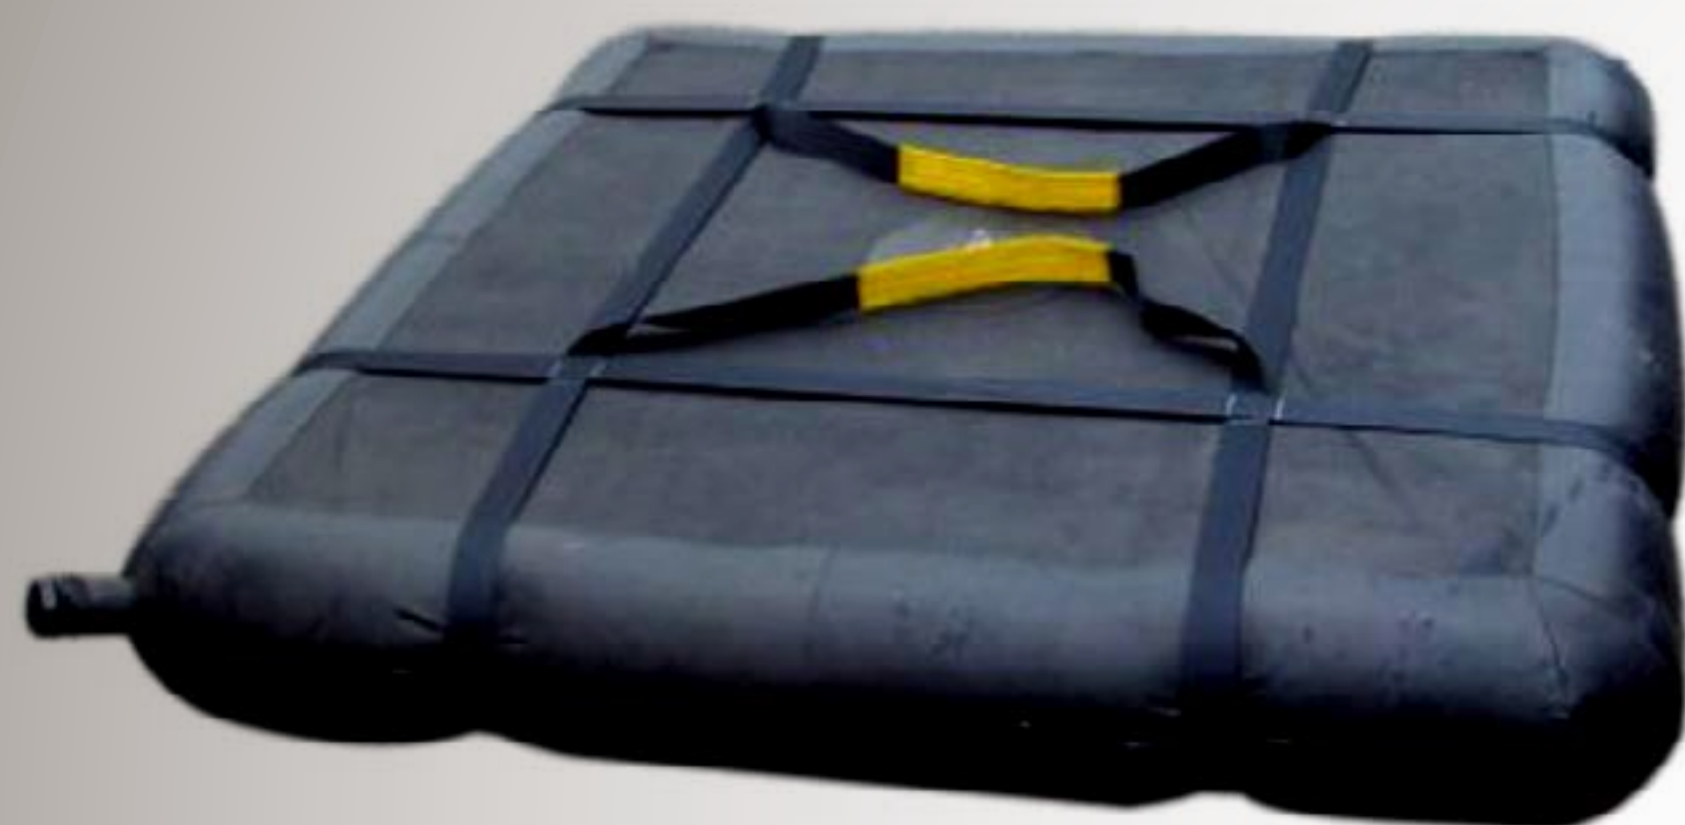

Due to the new manufacturing techniques of hot bonding with stitched and autoclave cured seams there are now no side walls allowing the empty bag to go completely flat.

This also makes it stronger, tougher and more durable and includes a combined drain and fill with one way valve which prevents water escaping when the hose is pulled out. Also new is an optional lifting net for moving position on site when full.

DESIGN | BUILD | INSTALL | SERVICE | TRAIN

ANCHORAGE ACCESSORIES & KITS

CheckRing EcoAnchor

ECO-MKII

Mobile Man Anchor

When collapsed, the ecoAnchor weighs just 8kg avoiding the need to transport heavy weights to the top of a building prior to installation.

- ▶ Suits roof types: EPDM, Mineral Felts, Concrete and Metal Deck up to 15°
- ▶ Compatible with HLL Temporary Lifelines
- ▶ Fire resistant neoprene reinforced with Nylon
- ▶ Weight: 8kg (empty) 430kg (full)
- ▶ Arrest force: all devices must be load limiting to under 6kN
- ▶ Puncture resistance: FED STD 191 Part 1520

Standards: **EN795 Class E**

DESIGN | BUILD | INSTALL | SERVICE | TRAIN

ANCHORAGE ACCESSORIES & KITS

HLL1

Webbing Temporary Lifeline

The HLL1 is a simple to install webbing system that can span between fixed anchorage points and provide a safe horizontal lifeline for up to two users. It comprises of 20m webbing, tensioner and bag as standard.

There are three variations:

HLL1W (plain loop ends)

HLL1WK (2 x swivel karabiners)

HLL1WS (2 x alloy scaffold hooks)

- ▶ 25mm low stretch water repellent and UV resistant polyester webbing with wear indicator
- ▶ Max 20m up to two persons
- ▶ Simple to install via ratchet style tensioner
- ▶ 4,000kg webbing strength

Standards: **EN795 Class C**

HLL125

25m Fibre Rope Temporary Lifeline

A simple to install temporary fibre rope lifeline system that can span between fixed anchorage points providing a safe horizontal anchorage for up to four users.

Configured to allow up to 25m of 16mm rope which comes with a swivel socket to reduce rope twist.

- ▶ 16mm low stretch polyester double braid with wear indicator
- ▶ Simple to install via RVTRope Vice Tensioner
- ▶ Pulley will slip to avoid over tensioning
- ▶ Lightweight and portable 1.6kg (RVT only)
- ▶ Alloy construction powder coated
- ▶ 4,950kg rope strength

Standards: **EN795 Class C**
